

VERSION WITH MARKINGS TO SHOW CHANGES MADE 09/938,729

IN THE TITLE:

Please **amend** the title as indicated below:

CONNECTION TO GRID TYPE ENGINE GENERATOR APPARATUS

IN THE SPECIFICATION:

Please **amend** the paragraph of the specification starting on page 1, line 5 with the following:

The present invention relates to an engine generator apparatus and particularly to an engine generator apparatus such as a generator facility for private use or a small-sized cogeneration system having a function for interconnecting with an electric power [system] grid.

Please **amend** the paragraph of the specification starting on page 1, line 20 with the following:

For smooth interconnection or parallel operation of [two] a electric power [system] grid, the cogeneration type generator apparatus needs to comply with the guideline for technical requirements for interconnection (issued by the Ministry of Trade) which stipulates technical

standards including a range of outputs of power systems and protections for the power [system] grid in case of ground fault or short-circuit. It is hence necessary to constantly monitor the apparatus for inhibiting discrepant actions from the requirements of the guideline due to a fault in the operation of the generator. A grid is a power network being a systematic network of power lines.
